SPECIFICATIONS
GIRTON PUMPMASTER WASHER MODEL PM6A

Specification No. PM6A
For Company Name

1. DESCRIPTION
The system is a self-contained washing unit designed for processing miscellaneous machine parts, filter housing, etc.
The unit consists of an insulated stainless steel tank, indirect steam heat, 5 Hp stainless steel sanitary pump, and distributor pipes, which create agitating action of the water.

2. REGULATIONS, CODES AND STANDARDS
All engineering, design, manufacture and testing conforms to all applicable sections of the latest edition of the following codes, standards and specifications in effect at the time of order:

- ASME-BPE - American Society of Mechanical Engineers
- ANSI - American National Standard Institute
- ASTM - American Society for Testing and Materials
- OSHA - Occupation Safety and Health Administration
- NEMA - National Electrical Manufacturers Associates
- NEC - National Electrical Code
- cGMP - Current Good Manufacturing Practices (CFR Title 21 parts 210 and 211)
- NFPA - National Fire Protection Association
- UL508A – Industrial Control Panels

3. DIMENSIONS AND WEIGHT
3.1. □Left □Right Hand
3.2. Overall Height: 38”
3.3. Overall Width: 36”
3.4. Overall Depth: 92”
3.5. Wash Chamber Size: 30” wide x 22” deep x 76” long
3.6. Operational Weight: 1,250 lbs.

4. CONSTRUCTION
4.1. Material Type and Finish:
4.1.1. Washer Tank: 14 gauge, □T-304 □T-316L stainless steel
    Interior Finish: □mill finish (2B) □35Ra or better □15Ra □8.5Ra
    Exterior Finish: 35Ra or better
4.1.2. Insulation Jacket: 18 gauge, T-304 stainless steel,
    Exterior Finish: 35Ra or better
4.1.3. Hinged Cover: □T-304 □T-316L stainless steel
    Interior Finish: □mill finish (2B) □35Ra or better □15Ra □8.5Ra
    Exterior Finish: 35Ra or better
4.1.4. Steam Heating Coil: T-304, T-316L stainless steel
Electric Heat: Incalloy elements

4.1.5. Steam and Condensate Piping:
- Interior on Washer: stainless steel T-304, T-316L schedule 10 pipe
- Exterior on Washer: stainless steel T-304 schedule 40 pipe

4.1.6. Compressed Air:
- Tubing: Poly-flo, T-304 stainless steel

4.1.7. Potable Water Supply Ball Valves: T-304 stainless steel
Steam Supply Ball Valves: T-304 stainless steel

4.1.8. Recirculation Header and Piping: T-316L stainless steel
- Interior Finish: 35Ra or better, Electro-polished to 15 Ra finish, 20Ra
- Exterior Finish: 35Ra or better

4.1.9. Purified Final Rinse System: T-316L stainless steel
- Interior Finish: 35Ra or better, Electro-polished to 15 Ra finish, 20Ra
- Exterior Finish: 35Ra or better

4.1.10. Sanitary valves: T-316L stainless steel diaphragm valves
- Interior Finish: 35Ra or better, Electro-polished to 15 Ra finish

4.1.11. Tri-Clamp Clamps: T-304 stainless steel

4.1.12. Fasteners: T-304 stainless steel

4.2. Unit Design:
The equipment is designed to be shipped and installed as a single unit. Some parts may be removed prior to shipping (i.e., pumps) to decrease the possibility of damages during shipping. The maximum crate size will be approximately _____” x _____” x _____” with an estimated weight of _______ lbs.

Bolted and gasketed construction allows the washer to be taken down prior to crating. There will be approximately _____ # separate pieces and the largest piece will be approximately _____” x _____” with an estimated weight of _______ lbs. A minimum clearance of _____” x _____” is necessary for access into the building. It is strongly recommended Girton Manufacturing Co., Inc. be contracted to re-assemble or supervise the re-assembly of the equipment due to the custom nature of the equipment.

4.3. All internal corners have a minimum 5/16” radius.

4.4. All visible welds on the exterior of the washing compartment are thoroughly cleaned. All welds on the interior of the washing compartment are ground and polished.

4.5. The cabinet interior is constructed to permit free draining and designed not to retain any of the process solutions.

4.6. The wash compartment is sloped to drain into the pump reservoir through a stainless steel, debris screen. The screen is easily removable without the use of tools.

4.7. The washer drains by gravity. An air activated two-way ball valve directs the discharge to the drain, resulting in a quick drain time.

4.8. The washer tank capacity is approximately 160-gallons of water, assuring effective cleaning and economy of operation. Level control is by means of a stainless steel float switch, which is tied into the washer control system.

4.9. All four sides and top are insulated with fiberglass and covered with a full jacket. This insulation package greatly reduces radiated heat loss from the washer making it more economical to operate and affords more comfort for the operators.

4.10. Hinged cover with limit switches to shut down the unit in the event the lid is opened during operation.

4.11. The wash tank is provided with a steam heating coil controlled by the control system (adjustable) to maintain the wash/rinse solutions at a pre-set temperature. A line strainer is supplied on the steam supply connection as well as condensate traps, where necessary.

The wash tank is provided with electric immersion heaters controlled by the control system (adjustable) to maintain the wash/rinse solutions at a preset temperature.
4.12. **Pumps:**

Sanitary recirculating wash/rinse pump is a T-316 stainless steel horizontal centrifugal type unit, powered by a 5 Hp motor.

4.13. **Potable water supply ball valves** are threaded connections.

Steam supply ball valves are threaded connections.

4.15. **Sanitary valves** have an EPDM diaphragm and tri-clamp ends. Two weep holes are located in the bonnet.

4.16. **Tri-clamp connection** use EPDM gaskets and are connected by means of heavy-duty clamps with wing nuts.

4.17. **Seals, gaskets, and bearings** are compatible with the temperatures and concentrations of cleaning agents to be used. Customer will supply information on chemicals to be used.

4.18. **A compressed air system** is supplied with a filter regulator.

4.19. **A stainless steel removable all-purpose rack** is supplied to process miscellaneous items.

4.20. The washer is piped and wired for **single service connection** for each utility requirement.

5. CONTROLS AND OPERATION

5.1. The control system incorporates an Allen Bradley Compact Logix® PLC. This provides 512K of memory with Ethernet communication ability. The processor is aware of and controls all items on the washer. I/O cards are selected to match the control voltage. An isolated relay card is used to control high current draw items or items not operable at the control voltage. Analog cards are set to accept 4 - 20 mA inputs, unless otherwise noted.

5.2. The operator-machine consists of an Allen Bradley Color Panelview Plus 6 - 600, which incorporates a touch screen for operator control. This allows the user with proper password level to access all parameters of a wash recipe. All alarms are shown on the display, as well as announced audibly.

5.3. Girton control panels will be designed, manufactured and labeled as per UL508A.

5.4. The washer is provided with the ability to use a printer to record operation reports. The customer should mount the printer close to the washer. Communication to the printer will be determined during detailed design and outlined in the specification. The report contains the following data: machine identification, operator, date and time, step name with time, temperature (min-max), etc.

5.5. **A typical treatment cycle** is defined as follows:

- Wash
- Rinse
- Purified Water Rinse

5.6. **A total of 20 programs** can be stored in the PLC. Each program can be altered or developed from the OIT. Access to change or develop the programs is password protected.

5.7. Girton provides four levels of **password protection** to the control system:

- Operator Level
- Maintenance Level
- Engineering Level
- Administration

5.8. Girton’s control system provides the ability to **alarm on abnormal conditions**. The washer has alarms based on each I/O point failure. This provides a comprehensive way of determining a device failure or process deviation. In general, all analog inputs to the system will have low and high alarm points settable by the customer. Also, all safety devices, such as door switches or emergency stop buttons, have alarms associated with them.

5.9. **Fused disconnect switch** is supplied and located in the main electrical enclosure to cut power to the entire unit. The system is designed so if the disconnect is in the “ON” position the electrical enclosure is not be able to be opened.
5.10. The washer is equipped with Emergency Stop switches located at critical points on the machine. All
doors are equipped with limit switches wired directly to the output voltage. Opening any door will
disconnect voltage from output cards thereby shutting down the system. These switches are also
wired as inputs to the PLC so that an alarm may be generated. All services are equipped with fail-
closed-valves.

5.11. Noise level as measured from 3 ft. from the washer will be a maximum of 85 dBA.

6. DOCUMENTATION

6.1. 1 Hard copy and 1 electronic copy of Girton Documentation Package. Validation requirements
and considerations are playing an increasingly major role in the purchase of new equipment or
systems. Validation requires documented evidence that the equipment or system will reliably perform
in a manner consistent with the original design specifications. Generation of this documentation
needs to be considered at the inception of the project and implemented throughout the design and
manufacturing stages of the equipment. In most instances, the equipment vendor is the most
qualified party to generate the majority of the required documentation.

The documentation provided by Girton Manufacturing Co., Inc. is designed to be a complete package
including all data and checklists necessary to qualify the installation and operation of the equipment
and/or system. All equipment built by Girton is completely factory assembled and tested. The
documentation is used to perform Factory Acceptance Testing; witnessed and approved by the
customer. All tests necessary for Installation and Operation Qualification of the equipment are
performed on the equipment prior to its arrival on the job-site. Any modifications or additions required
to qualify the equipment can be made at the factory prior to shipment.

This index lists all documentation supplied by Girton Manufacturing Co., Inc.

Please reference Project Deliverables, attached to this specification.

7. SERVICE REQUIREMENTS

7.1. Electrical: 3 phase, 60 cycle, □208 □230 □460 volt, _____ amperes.

7.2. Hot Water: 180°F. Recommended minimum rate of flow of 20 gallons per minute. 1-1/2” tri-clamp
connection to the machine.

7.3. Final Rinse: (D.I., WFI, etc.) 180°F minimum flow rate 20 gpm at 30 PSI. 1-1/2” tri-clamp
connection.

7.4. □Steam: 40 to 80 PSI. 1-1/2” NPT connection to the machine (for most efficient operations, 60 PSI
is recommended). 200-lb./hr. requirement.

7.5. □Condensate: 3/4” NPT.

7.6. Drain: 2” NPT from the machine to the drain.

7.7. Ventilation: 6” diameter vent collar is provided for connection to ventilating system. 300 CFM
minimum removal required. Connection should be installed inside of vent collar to prevent leakage.

7.8. Compressed Air: 1/4” NPT connection, 90-PSI minimum, 5 CFM.

8. WARRANTY

8.1. Girton Manufacturing Co., Inc. warrants equipment of original manufacture against defect in
workmanship and material for a period of one year from date of shipment. Provided; however, the
equipment has been operated under normal working conditions for such said equipment, that it has
been properly serviced and cared for, and that no adjustments have been made by unauthorized
personnel that could adversely affect the operation or life of the equipment.

Girton Manufacturing Co., Inc. will replace or repair defective merchandise at its plant, FOB Millville,
PA, if after inspection; the equipment or components that Girton manufactured are defective.
Girton Manufacturing Co., Inc. extends to its customers on all purchased components parts, the
warranty of the supplier of such said parts.

No expense, liability, or responsibility will be assumed by Girton for repairs outside Girton’s factory,
without written authority from Girton Manufacturing Co., Inc.

The foregoing warranty excludes all other warranties, guaranties, and/or representations; whether
expressed, implies, or oral, INCLUDING, BUT NOT LIMITED TO, ALL CONDITIONS AND EXCLUSIONS OF IMPLIED WARRANTY OF MERCHANTABILITY AND OR FITNESS FOR THE PURPOSE, and the warrantor’s liability for any direct damage arising from a legally proven breach of the warranty hereby extended is limited to the customer’s invoice cost of the goods warranted.

8.2. DISCLAIMER OF CONSEQUENTIAL DAMAGES LIABILITY - Girton Manufacturing Co., Inc. shall not be liable for consequential damages of any kind, including incidental labor or other costs.

9. CANCELLATION

9.1. Any order on which work had been started may be cancelled only by consent of Girton Manufacturing Co., Inc. and by agreement on the part of the purchaser to cover whatever cost has been incurred, if any, to the date of the cancellation, including engineering, administrative, material purchases, labor, and overhead expended.

10. CUSTOMER TO WITNESS PRELIMINARY FACTORY ACCEPTANCE TEST (FAT)

10.1. Customer may witness preliminary testing performed at Girton Manufacturing Co., Inc. prior to shipment to customer’s facility.

Customer will supply adequate samples of the items being washed. If customer specifies a particular chemical to be used, they shall supply it, complete with a MSDS Report. Customer shall be responsible for disposal or removal of excess chemical from premises.

10.2. Factory Acceptance Test (FAT) – Girton Manufacturing Co., Inc. will provide the necessary personnel for a maximum of 3 days to assist with the Factory Acceptance Test (FAT). The Girton Factory Technicians will work with the customer’s personnel in verifying the washer is built and operates according to the FAT documentation.

11. DOCUMENTS

11.1. Approval Documents will be provided to the Customer in ___ days ___ weeks after receipt of order. Production work will not be initiated until these drawings are returned to Girton Manufacturing Co., Inc. with the appropriate signatures of the customer.

12. INSTALLATION

12.1. Installation will be done by others.

☐ Supervision of installation by Girtons - Girton Manufacturing Co., Inc. will provide a technician for _____ (# of days) who will work with the customer’s in-house personnel or with an outside contractor. The technician(s) will provide instructions for all phases of re-assembly including moving the equipment, leveling, re-assembly, and connection to utilities for an additional fee.

☐ Set-in-place installation by Girtons -
  ☐ Girton Manufacturing Co., Inc. will provide the necessary non-union labor to re-assemble the equipment and make it ready for utility connections at the customer’s site. The customer will be responsible for receiving the equipment, unloading and moving it to the area where it is to be installed prior to Girton’s arrival and for connecting the utilities.
  ☐ Girton Manufacturing Co., Inc. will provide the necessary union labor to re-assemble the equipment and make it ready for utility connections at the customer’s site. The customer will be responsible for receiving the equipment, unloading and moving it to the area where it is to be installed prior to Girton’s arrival and for connecting the utilities.

☐ Complete installation by Girtons
  ☐ Girton Manufacturing Co., Inc. will provide the necessary non-union labor and material to perform a complete installation of the equipment. This includes receiving the equipment at the customer’s site, unloading, uncrating, move in place, re-assembly and connection to existing utilities. The utilities must be within 4 feet from the equipment.
  ☐ Girton Manufacturing Co., Inc. will provide the necessary union labor and material to perform a complete installation of the equipment. This includes receiving the equipment at the customer’s site, unloading, uncrating, move in place, re-assembly and connection to existing utilities. The utilities must be within 4 feet from the equipment.

13. TERMS AND CONDITIONS
13.1. Payment Terms:
   Please consult factory.

13.2. The 6% PA sales tax will be assessed on all sales. If you believe the products covered by this proposal are exempt from this tax, please send to Girton Manufacturing Co., Inc. your PA sales tax exemption certificate.

14. SHIPPING

14.1. Freight terms:
   □Collect
   □Prepaid □by customer □and add to Invoice
   □Third Party Billing

14.2. Shipment will be provided by □transportation arranged by Girton Manufacturing Co., Inc. □customer.

14.3. Shipment from Millville, PA ___ to ___ weeks, after receipt of Approved Drawings by Girton Manufacturing Co., Inc.

15. TOTAL COST PER SPECIFICATION, CONSULT FACTORY

16. OPTIONS

16.1. The Human Machine Interface (HMI), mounted on the washer, consists of a Allen Bradley PLC based display Model RAC6181, which will be programmed using RSView SE software, which incorporates a touch screen for operator control and monitoring. This allows the user with proper password level to access all parameters of a wash recipe. All alarms are shown on the display, as well as announced audibly. Use of this system complies with CFR21 Part 11.

16.2. T-316L construction on all wetted surfaces with the exception of distribution hoses.

16.3. Process piping and purified final rinse will be electro polished to a 15Ra finish on the interior. OD will be 35Ra or better finish.

16.4. Interior finish to be a 35Ra or better finish.

16.5. The discharge pressure of the main circulation pump is monitored using a sanitary pressure transmitter. This pressure is recorded and alarmed by the control. The diaphragm of the sensor is attached in the wash pump discharge line using a tri-clamp connection. Girton's standard range for measuring pump pressure is 0 to 100 psi. Girton's preferred vendor is Rosemount for the instrument.

16.6. All compressed air lines are T-304 stainless steel with Swagelok compression split ferrule type fittings.

16.7. A sample port in the recirculation sump allows sampling of the water from the face of the washer. The sample port is attach via tri-clamp with connecting piping to have sufficient pitch in order to drain back into the washer recirculation tank, thus eliminating the possibility of dead legs.

16.8. A drain tempering system cools the process wash and rinse solutions from 180°F to 140°F prior to entering the customer's drain. This system consists of a temperature control with a probe located in drain line for on-off control of cold water supply valve.

16.9. The conductivity of any wash solution where a reagent is added is monitored, recorded and, if needed, alarmed by the control. A sensor is attached either in the wash pump discharge or directly into the sump. Both are inserted into a sanitary tri-clamp connection. Girton's standard range for measuring wash solution conductivity is 0 to 20 millisiemens.

16.10. The conductivity of the final rinse with the customer's designated water will be monitored, recorded and, if needed, alarmed by the control. The sensor is attached in or near the drain line with a sanitary tri-clamp connection. Girton's standard range for measuring final rinse conductivity is 0 to 20 microsiemens.

16.11. Automatic detergent dispensing system is provided with the control system. One (1) diaphragm pump is used to charge the wash solution with the desired reagent. The customer sets the amount of time that each dispenser will run for the wash cycle.

16.12. For each reagent reservoir, Girton supplies a level monitor. The monitor will consist of an ultrasonic sensor that will switch a PLC input when the reagent reaches the specified level. The control can then either trigger an alarm or a status message based on the input. The sensor has threads allowing it to be mounted into the lid of the customer's detergent reservoir.
16.13. A **sanitary pressure switch** is located in the recirculation pump discharge. To sense and alarm when the pump pressure drops below set point. The pressure switch is attached to piping via tri-clamp connections.

16.14. A **remote mounted dot matrix printer** will be provided so that a printed record of each cycle can be obtained.

16.15. The washer is specified to be in a **Class I Division 2 Group D area**. All wiring, conduit, instruments, and other devices conform to the NEC and NFPA regulations for the class and division of the washer. If required, purged enclosures will be provided as well as explosion resistant conduit.

16.16. All **conduit** on the machine are PVC coated rigid. Fittings and conduits are PVC coated as well. Liquid tight flexible conduit is used to connect the washer's devices. Lengths of flexible conduit do not exceed 3 feet. All marks on conduit are painted with PVC paint. All conduit installation meets the current NEC requirements.

16.17. All controls are rated at **24VDC**, if possible. Items not able to operate at 24VDC have a control relay that will provide contacts usable at 120VAC.

16.18. Each motor under control have a locally mounted **HAND-OFF-AUTO** switch and a “Run” light. In HAND position, the motor runs; in OFF position, the motor stops; in AUTO position, the motor is under PLC control.

16.19. The wash tank is provided with **electric immersion heaters** controlled by the control system (adjustable) to maintain the wash/rinse solutions at a preset temperature.

16.20. A **pass-through heat exchanger** raises the incoming potable water temperature from 140°F to 180°F. This option is required when fast cycle times are required and ample hot water is not available from the facility supply.

16.21. **Sanitary pump liquid filled pressure gauge** with tri-clamp connections are supplied and located in the pump discharge piping to allow visual inspection of actual pump pressure.

16.22. **Additional copies of our Documentation Package** (reference item # _____ of this specification) may be purchased.

16.23. **Optional Documentation:**

   16.23.1. Surface Finish Map and Certificate of Compliance
   16.23.2. Slope Map of Process Contact Tubing and Certificate of Compliance
   16.23.3. Video Weld Logs
   16.23.4. Sound Level Certificate of Conformance

16.24. **Supervision of installation (YSOFI)** – Girton Manufacturing Co, Inc. will provide ONE Qualified Technician for ___ on-site days to Supervise and Direct Customer Personnel, Contractors or Subcontractors in all phases of Installation. This includes oversight of Uncrating and Moving the Equipment into a prepared(1) Wash Room, Leveling and Reassembly, Utility(2) and Additional Support Systems(3) Connections. Supervision of Unloading the Shipping Truck will be performed only if delivery occurs during the scheduled timeframe.

   Supervision of Installation (SofI) does **not** include Sub-Contracting, Equipment or Tools or Tool Rental, Dumpsters and/or Trash Disposal, Multiple Trips from our Factory (except at our discretion and as deemed necessary by our Technical Service Manager), Additional Site Preparation, Materials for Floor Protection, Integration Materials or Fabrication (other than Modular Walls, Fascia Panels, and items purchased from Girton Mfg. as an option), Equipment Start Up, Training of Personnel or Assisting with SAT or Validation Documentation.

   The Customer will be responsible for all facets of installation not specifically included above. Equipment Start Up, Training of Personnel, Assisting with SAT or Validation Documentation may be purchased from Girton separately.

   A Field Report will be submitted to the Customer within one week of completion of the installation.

   Supervision of Installation is a quoted option and valid as part of the original equipment order. Service ordered after the original equipment order date will require a re-quote. Travel expenses are included in the first day billing. Additional contiguous days may be purchased for a flat fee of $_____.00 per day, but should be purchased prior to the first on-site day, if possible. This information
is based on non-union labor. Special provisions and prices apply when union labor and/or prevailing wages are required. Contact your Sales Rep for further details.

16.25. **Set-in-place Installation (YSIP)** - Girton Manufacturing Co, Inc. will provide Qualified Technicians for ___ on-site days to Unload and Uncrate, Move the equipment to a prepared(1) location, Reassemble and Level the Equipment. Girton Manufacturing Co, Inc. will provide all Personnel, Material, Tools and Equipment to perform the task, including Fork Trucks, Dumpsters, Welders, Hand Tools, Floor Protection and Trash Elimination.

Set-In-Place Installation (SIP) does not include Utility(2) Connections, Connection of Additional Support Systems(3), Multiple Trips from our Factory (except at our discretion and as deemed necessary by our Technical Service Manager), Additional Site Preparation, Integration Materials or Fabrication (other than Modular Walls, Fascia Panels, etc., purchased from Girton Mfg. as an option), Equipment Start Up, Training of Personnel or Assisting with SAT or Validation Documentation.

The Customer will be responsible for all facets of installation not specifically included above. Equipment Start Up, Training of Personnel, Assisting with SAT or Validation Documentation may be purchased from Girton separately.

A Field Report will be submitted to the Customer within one week of completion of the installation.

Set-In-Place Installation is a quoted option and valid as part of the original equipment order. Service ordered after the original equipment order date will require a re-quote. Travel expenses are included in the first day billing. Additional contiguous days may be purchased for a flat fee of $_____.00 per 8 Hr. man-day, but should be purchased prior to the first on-site day, if possible.

This information is based on non-union labor. Special provisions and prices apply when union labor and/or prevailing wages are required. Contact your Sales Rep for further details.

16.26. **Complete Installation (YINSTALL)** - Girton Manufacturing Co, Inc. will provide Qualified Technicians for ___ on-site days toUnload, Uncrate, Move the equipment to a prepared(1) location, Reassemble, Level the Equipment and Connect Utilities(2) to existing stubs within 6' of the machine. Girton Manufacturing Co, Inc. will provide all Personnel, Material, Tools and Equipment to perform the task, including Fork Trucks, Dumpsters, Welders, Hand Tools, Floor Protection and Trash Elimination. Test and Demonstration (see below) is part of this option. If this cannot be completed contiguously (due to unavailable utilities, Customer personnel availability, etc.), a return trip must be scheduled and additional travel expenses will apply.

Complete Installation (CI) does not include Multiple Trips from our Factory (except at our discretion and as deemed necessary by our Manager), Additional Site Preparation, Connection of Additional Support Systems(3), Integration Materials or Fabrication (other than Modular Walls, Fascia Panels, etc., purchased from Girton Mfg. as an option), Equipment Start Up, Training of Personnel or Assisting with SAT or Validation Documentation.

The Customer will be responsible for all facets of installation not specifically included above. Equipment Start Up, Training of Personnel, Assisting with SAT or Validation Documentation may be purchased from Girton separately.

A Field Report will be submitted to the Customer within one week of completion of the installation.

Complete Installation is a quoted option and valid as part of the original equipment order. Service ordered after the original equipment order date will require a re-quote. Travel expenses are included in the first day billing. Additional contiguous days may be purchased for a flat fee of $_____.00 per 8 Hr. man-day, but should be purchased prior to the first on-site day, if possible.

This information is based on non-union labor. Special provisions and prices apply when union labor and/or prevailing wages are required. Contact your Sales Rep for further details.

16.27. **Test and Demonstration (YTD)** - Girton Manufacturing Co, Inc. will provide ONE Qualified Technician for ___ on-site days to perform Start Up Testing, such as verifying utility connections and capacities, electrical supply voltage and amperage, motor rotations, completeness of assembly, missing components, etc, on fully installed(4) equipment. The Technician will make normal equipment adjustments and test operation against factory standards. Upon completion of satisfactory testing, the Technician will demonstrate all phases of the use and operation of the equipment to any interested parties, provided sufficient time is allotted. We recommend that three to four hours be dedicated for effective demonstration. We highly recommend that at least one User of each level of access (Operator, Maintenance, Supervisor/Engineering, Administrative) be present for the demonstration.

Demonstration must not be confused with training; it is NOT a substitute for a complete and formal
training session, ‘Demonstration’ is informal, with the Technician covering the highlights of the equipment and operation and hazard awareness, and answering questions from interested parties. No handout sheets or post-training testing is given.

Test and Demonstration (T&D) does not include mechanical reassembly or completion of wiring or pneumatics (on-skid or otherwise), any function that is normally part of the three Installation options described above, Multiple Trips from our Factory (except at our discretion and as deemed necessary by our Technical Service Manager), Additional Site Preparation, or Assisting with SAT or Validation Documentation.

The Customer will be responsible for all facets of installation not specifically included above. Supervision of Installation, Set in Place Installation, Complete Installation, Training of Personnel, Assisting with SAT or Validation Documentation may be purchased from Girton separately.

A Field Report and a copy of an Attendance Record for the demonstration will be submitted to the Customer within one week from the end of the visit.

Test and Demonstration is a quoted option and valid as part of the original equipment order. Service ordered after the original equipment order date will require a re-quote. Travel expenses are included in the first day billing. Additional contiguous days may be purchased for a flat fee of $_____.00 per 8 Hr. man-day, but should be purchased prior to the first on-site day, if possible.

This information is based on non-union labor. Special provisions and prices apply when union labor and/or prevailing wages are required. Contact your Sales Rep for further details.

16.28. **Start Up (YSTART)** - Girton Manufacturing Co, Inc. will provide ONE Qualified Technician for ___ on-site days to perform Start Up Testing, such as verifying utility connections and capacities, electrical supply voltage and amperage, motor rotations, completeness of assembly, missing components, etc., on fully installed equipment. The Technician will make normal equipment adjustments and test operation against factory standards. Start Up does not include mechanical reassembly or completion of wiring or pneumatics (on-skid or otherwise), any function that is normally part of the three Installation options described above, Multiple Trips from our Factory (except at our discretion and as deemed necessary by our Technical Service Manager), Additional Site Preparation, or Assisting with SAT or Validation Documentation.

The Customer will be responsible for all facets of installation not specifically included above. Supervision of Installation, Set in Place Installation, Complete Installation, Training of Personnel, Assisting with SAT or Validation Documentation may be purchased from Girton separately.

A Field Report will be submitted to the Customer within one week from the end of the visit.

Start Up is a quoted option and valid as part of the original equipment order. Service ordered after the original equipment order date will require a re-quote. Travel expenses are included in the first day billing. Additional contiguous days may be purchased for a flat fee of $_____.00 per 8 Hr. man-day, but should be purchased prior to the first on-site day, if possible. This information is based on non-union labor. Special provisions and prices apply when union labor and/or prevailing wages are required. Contact your Sales Rep for further details.

16.29. **Training (YTR)** - Girton Manufacturing Co, Inc. will provide ONE Qualified Technician for ___ on-site days to formally and thoroughly provide in-depth training to Operators, Maintenance Technicians, Engineering and Administrative Level Personnel. Our Technician will provide a combination of classroom and hands-on field training. A ‘Question and Answer’ period is encouraged.

16.29.1. **Topics covered are:**
- Hazard Awareness,
- Alarms and the causes of and responses to them,
- Routine Operation,
- Routine Maintenance and Trouble Shooting,
- Set Up, Management and Modification of Recipes (Cycles),
- User Management (Administration).

16.29.2. **Training (TRN)** covers the full range of access and use:

16.29.2.1. ‘Operator’ level training covers the daily operation and maintenance, and is the shortest and most basic training.

16.29.2.2. ‘Maintenance’ level training includes full Operator training and adds the extensive maintenance diagnostic capabilities available through the HMI, and PM requirements.
16.29.2.3. **Engineering** level training will include condensed Operator and Maintenance coverage and adds in-depth Recipe (Cycle) Generation and Management and Recipe and Alarm Set Points. Engineering training is typically restricted to those individuals responsible for control of validated operation.

16.29.2.4. **Administrator** level training will have condensed coverage for all levels of use, but will focus primarily on User Administration and Security. At this level, Users Names and Passwords are assigned and Levels of Access Controlled.

Whenever possible, a computer presentation will be shown and pertinent hand out sheets will be distributed. An Attendance Roster and post-training Retention Test will be given and copies will be provided to the Customer.

Training is a quoted option and valid as part of the original equipment order. Service ordered after the original equipment order date will require a re-quote. Travel expenses are included in the first day billing. Additional contiguous days may be purchased for a flat fee of $______,00 per day, but should be purchased prior to the first on-site day, if possible. This information is based on non-union labor. Special provisions and prices apply when union labor and/or prevailing wages are required. Contact your Sales Rep for further details.

16.30. **Site Acceptance Testing Assistance (YSAT)** - Girton Manufacturing Co, Inc. will provide ONE Qualified Technician for ___ on-site days to assist the Customer’s Validation Group(s) with IQ/OQ of fully installed(4) and running equipment. Girton Mfg. will provide an SAT Template based on the factory test documents and appropriate programming software and test instruments necessary to duplicate the factory tests. Girton Technicians will assist the Customer by providing clarification of test procedures and test results, and through our experience with the PLC and HMI Programming. Sample SAT documents are typically submitted to the Customer for early review. Machine specific documents shall be submitted to the Customer a minimum of two weeks prior to SAT.

Girton Technicians will not be responsible for completing partial installations, test document revisions or test completion.

A Field Report will be submitted to the Customer within one week of completion of the SAT.

Site Acceptance Test is a quoted option and valid as part of the original equipment order. Service ordered after the original equipment order date will require a re-quote. Travel expenses are included in the first day billing. Additional contiguous days may be purchased for a flat fee of $______,00 per day, but should be purchased prior to the first on-site day, if possible. This information is based on non-union labor. Special provisions and prices apply when union labor and/or prevailing wages are required. Contact your Sales Rep for further details.

16.31. **Notes:**

16.31.1. (1) “Prepared” site is defined as one at which the building is enclosed, the floor and floor coatings are complete and where Girton personnel can work reasonably unhindered. Electricity (for tools) must be available. It is preferred, but not mandatory, that utilities(2) are complete and available.

16.31.2. (2) “Utilities” are defined as Potable Water (Hot and/or Cold), Steam, Condensate, Ventilation, Electrical, Compressed and/or Instrument Air, and Drains. “Utilities” does not include Purified (DI, WRO, WFI, etc.) water sources that require high-purity pipe welding, remote Detergent systems or controls, Chiller/Glycol system piping, Facility Control or Data Systems, networked or otherwise.

16.31.3. (3) “Additional Support Systems” are defined as Purified Water (DI, WRO, WFI, etc.), Chiller systems, Detergent Systems, Combustible Liquids or Gas, and Breathing Air. Connection of Additional Support Systems is always the responsibility of the Purchaser.

16.31.4. (4) “Fully Installed” is defined as the equipment being in-place and leveled, and connected to all utilities and additional support systems. Integration with building fabric is not required.

* Excluding Saturdays, Sundays and/or Holidays, unless prearranged.

### OPTIONS

- Indicating Pressure Transmitter: Endress + Hauser
- Manual Valves for Y-Strainers: Dura Valve
- Stainless Steel Compressed Air Fittings: Swagelok
- Sample Port: Sentinel
- Drain Tempering System
  - A. Cold Water Control Valve: Duravalve
  - B. Manual Throttling Valve: Duravalve
- Conductivity Sensors: Mettler-Toledo Thornton
- Detergent Dispenser: Wilden
- Chemical Container Level Sensors: IFM
- Pressure Switch: Tri Clover
- Electric Heating Elements
  - A. Electric Contractors: Allen Bradley
- Pump Pressure Gauge: Tri Clover
- Pneumatic Door Seal: Pawling
pH Analyzer
Compressed Air Dump Valve

Mettler-Toledo Thornton
Ross Controls
Pump-Master
C.O.P. - C.I.P. Cleaning Equipment

For the food, dairy, meat, bakery, candy, pharmaceutical, cosmetics and metal cleaning industries.

Meeting the needs of the food industry since 1927.
## Overall Dimensions
- **PM6A**: Length: 88”, Width: 34 1/2”, Height: 38 3/4”
- **PM10A**: Length: 136”, Width: 34 1/2”, Height: 38 3/4”

## Inside Dimensions
- **Length**: 76”, Width: 30”*, Height: 22”
- **PMX Tube & Fitting Washer (Dryer)**

## Shipping Weights
- **Domestic**: 500, 1000
- **Foreign**: 700, 1250

*Note: With two Adjustable Distributor Pipes installed, Unobstructed Inside Width Is A Full 24”

---

For long tubular parts, we recommend the Turbo Jets, one in each of the two discharge connections.

For valves, fittings, machine parts, molds, etc., the unit should be fitted with one or two adjustable distributor pipes to develop the rolling turbulence as pictured above.

---

**Custom Pump-Master**
Consult the factory for special dimension washers to suit your particular requirements.

**Pump-Master**
With Drum Draining Fixture
